BITSS VWAR
User Manual (Version 3.00)

Table of Contents

End of Manual

1. Dashboard Overview

The Dashboard is the main control panel of VWAR Scanner.

From here, you can view your system's protection status, perform scans, and access all major functions.

1.1 User Information

- **User:** bitss
- **License Valid Till:** 2026-11-01
- **Version:** 3.00

1.2 Navigation Menu

- **Home:** View dashboard and current scan status
- **Scan:** Start manual scanning
- **Backup:** Save and manage system backups
- **Scan Vault:** Access live file monitoring
- **Help:** View user guide and support information
- **Schedule Scan:** Configure automatic scans

1.3 Auto Scanning

- **Status:** Running
- **Update:** System is up to date

1.4 Support & Legal

Developer: BFIN IT Private Limited

Website: www.bitss.one

Support Email: support@bobsohomail.com

2. Scanning Page Overview

The Scanning Page lets you scan files and folders manually. All scans generate detailed reports, including Matched Files and Tested Files.

2.1 Scan Controls

- **Select Target File:** Choose a specific file to scan
- **Select Target Folder:** Scan all files in a selected folder
- **Scan:** Begin the scanning process
- **Stop:** Cancel an active scan

2.2 Status & Messages

- **Drag & Drop:** Drop files or folders to start scanning instantly
- **Progress Bar:** Displays scan completion percentage
- **System Logs:** Shows warnings and rule compilation info

2.3 Scan Results

**Matched Files:** Files identified as threats or matching YARA rules

Tested Files: All scanned files

2.4 Quarantine Access

Show Quarantined Files: Manage and review flagged files

3. Backup & Restore Overview

This section allows you to manually or automatically back up your system and restore it when needed.

3.1 Backup Functions
- **Manual Backup:** Create a backup instantly
- **Restore Backup:** Recover from a previous backup
- **Enable Auto Backup:** Schedule automatic backups

3.2 Manual Backup Page
Selection Controls
- **Select Files:** Add files to backup list
- **Remove File:** Delete a selected file from the list
- **Select Folders:** Add folders to backup
- **Remove Folder:** Delete selected folder

Destination Setup
- **Select Destination:** Choose backup storage path
- **Start Backup:** Begin backup (enabled once files/folders are selected)

3.3 Restore Backup Page

- Step-by-Step Restore
- Select VWARBackup Folder (Source)
- Choose Backup Files/Folders to restore

Set Restore Location and start the restore process

- **Browse:** Locate backup folder
- **Select Files / Folder:** Choose items to restore
- **Remove All:** Clear all selections
- **Select Location:** Define restore destination
- **Start Restore:** Begin restoration

4. Auto Backup Settings Overview
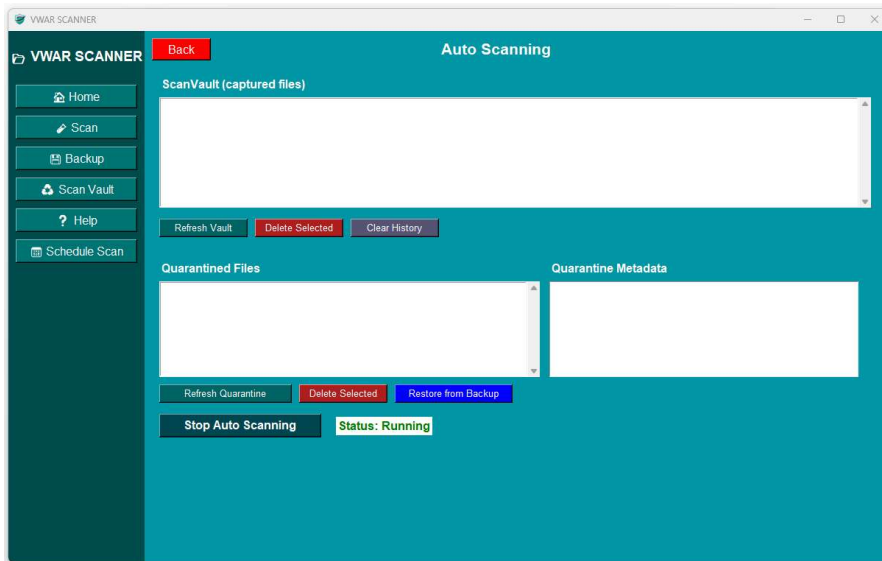

Schedule backups automatically at a specific time and location.

4.1 Backup Configuration
- **Backup Time:** 24-hour format (e.g., 14:00)
- **Add Folder:** Choose folders to include
- **Clear All:** Remove all selected folders
- **Set Destination:** Choose backup save path
- **Save Settings:** Activate the schedule

5. Auto Scanning / Scan Vault
Monitor live scans, handle quarantined items, and view captured files.

5.1 ScanVault & Quarantine

- **ScanVault:** View captured files
- **Quarantined Files:** See flagged or suspicious files
- **Quarantine Metadata:** Review detailed info of quarantined items
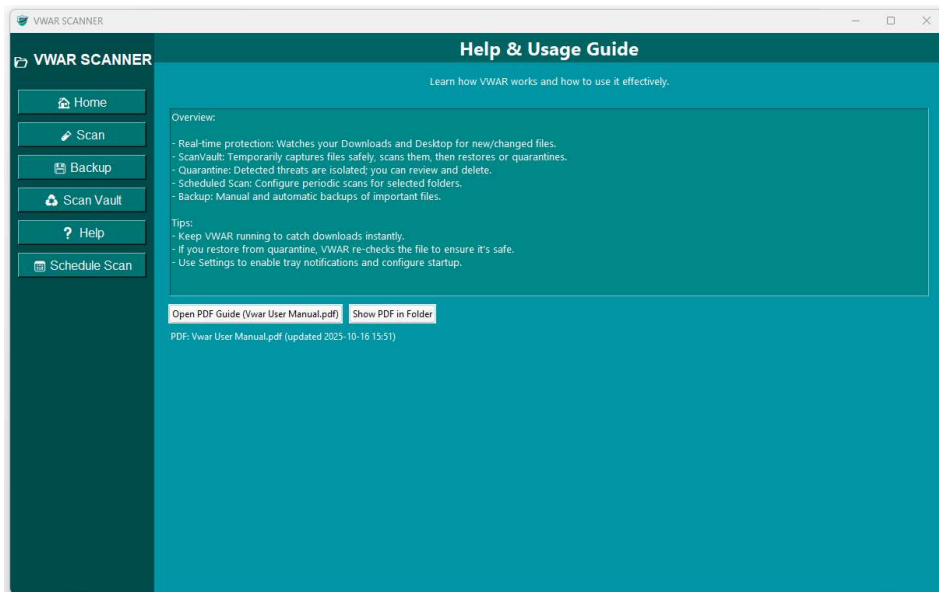

5.2 Management Controls
- **Refresh Vault / Quarantine:** Update lists
- **Delete Selected:** Remove chosen entries permanently
- **Clear History:** Wipe all scan logs
- **Restore from Backup:** Recover quarantined files

5.3 Scan Status
- **Status:** Running / Stopped
- **Stop Auto Scanning:** Terminate live scan

6. Help & Settings Overview

Get help resources and configure the scanner's operational behavior.

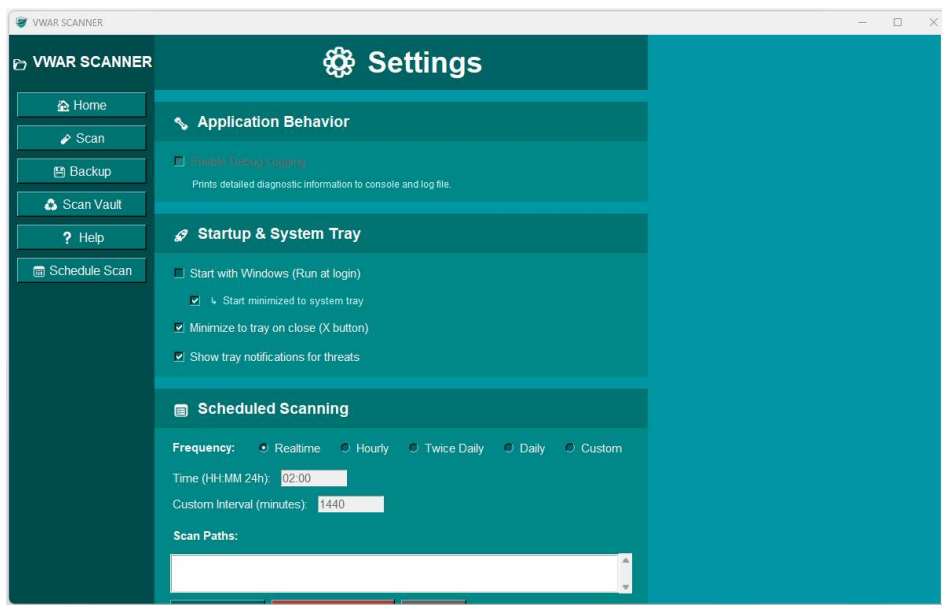

6.1 Help & Usage Guide

- **Real-Time Protection:** Monitors Desktop and Downloads
- **ScanVault:** Temporarily quarantines matched files
- **Quarantine:** Allows file recovery after isolation
- **Scheduled Scan:** Automate folder scanning
- **Backup:** Manual and automatic options available

Tips: Keep VWAR active, enable tray notifications

PDF Manual:

- **Open PDF Guide:** View detailed manual
- **Show PDF in Folder:** Access documentation files

6.2 Scan Frequency & Behavior Settings

Application Behavior
- Enable Debug Logging for detailed logs

Startup & Tray Options
- Start with Windows
- Minimize to Tray
- Show Tray Notifications

Scheduled Scanning
- **Frequency:** Realtime, Hourly, Twice Daily, Daily, Custom
- **Time:** Set in 24h format (e.g., 16:00)
- **Custom Interval:** Set minutes (e.g., 1440)
- **Scan Paths:** Display folders to be scanned

7. Scan Paths & Exclusions

7.1 Scan Paths Section

Add Folder: Include folders for scanning

Remove Selected / Clear All: Manage scan list

Include Subdirectories: Scan inside folders
